

## Environment & Climate policy

Roblon wants to be an environment-conscious company committed to ensuring a continuously environmentally sound development through its activities, with due consideration for natural resources, statutory requirements, and other relevant provisions.

Roblon A/S is certified according to ISO 14001:2015.

Roblon realizes its policy by:

- having a well-developed environmental management system.
- surveying environmental aspects and preparing risk assessments and action plans to minimize the risk of environmental impact.
- having a system that monitors applicable laws and regulations.
- continuously try to prevent and reduce the external environmental load of the company within our financial and technical possibilities.
- through co-operation with our partners continuously follow the development of new technology within materials and processes, which may contribute to prevention and reduction of the external environmental load.
- performing risk assessments of our use of chemicals on a regular basis to ensure compliance with the applicable laws and regulations
- supplying customers with relevant information on the external environmental load by use and removal of the products.
- Focusing on sustainability and waste recycling.
- taking a sustainable approach to acquiring new equipment for manufacturing processes.
- keeping employees and others working on behalf of Roblon informed of the Company's environmental policy and environmental management system.
- conducting internal audit and follow-up.
- having a continuous improvement program.
- education, training, and involvement of employees.
